摘要

In modern information technology and knowledge-based economy, due to the rapid development of internet, the limits of time and space was broken, also the methods of further studies and training education had produced a comprehensive change, E-Learning is just one of the good tools for training mechanism. The purpose of this study was based on the theory of TAM, to investigate the relationship between the differences of police personnel personal background variables, external variables (Computer Self-Efficacy, Autonomous Learning) and the Technology Acceptance Model variables (Perceived Usefulness, Perceived Ease of Use, Behavioral Intention to Use), in order to understand the influences of factors of the Behavioral Intention to Use E-Learning websites by police personnel.

關鍵字 : police personnel, E-Learning, Technology Acceptance Model, Behavioral Intention to Use .
